

Project information

Project type:	New RES
Address:	H.P. Christensensvej 14
End construction year:	2009
Installed thermal capacity:	5,5 MW
Estimated production:	35,000 MWh/year
Wood chip consumption:	35-40 tons/day
Operating temperature:	100-115 °C
Minimum combustible:	541 kg/h
Maximum combustible:	2165 kg/h
Total eligible costs:	
Total costs:	4,963,522 €

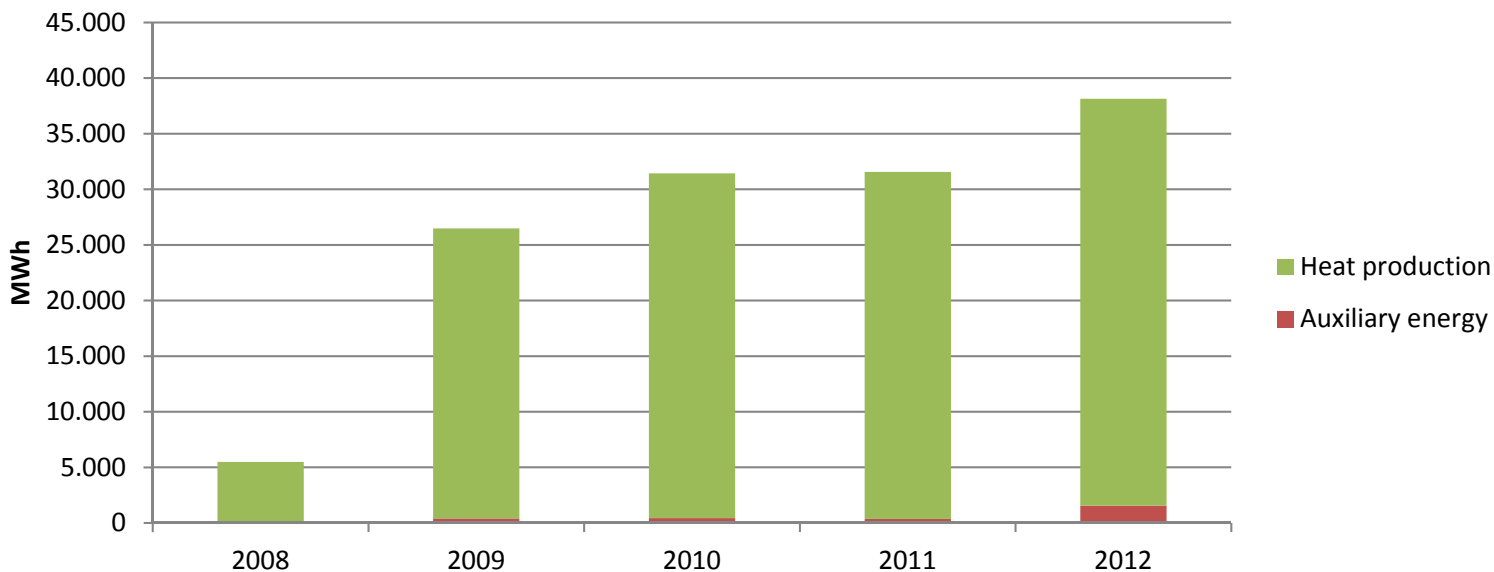

Special ECO-technologies applied:

To the right: The smoke washer and the woodchip store

Energy consumption

Annual heat production
